1. **Status:** Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 05-18-2007 under request for reconsideration, which have been placed of record in the file. Claims 1-8,13-17,21,25,29,30,32 and 34-39 are pending in this action. Claim 9-12,18-20,22-24,26-28,31 and 33 are cancelled.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 05-18-2007 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Response to Amendment

3. Claims 36-39 were allowed. Claims 1-8,13-17,21,25,29,30,32 and 34-39 are pending. Claims 9-12,18-20,22-24,26-28,31 and 33 are cancelled. Applicant's arguments, see Remark, filed 05-18-07, with respect to Claims 1,13,21,29,34 regarding "a multi-channel gamma voltage generator having a plurality of digital to analog converters (DACs), the digital to analog converters generating n gamma voltages (wherein n is an integer) having a different voltage level in response to the digital gamma data respectively and the DAC generates different sets of gamma reference voltages depending on a control signal; responding to the one set of the gamma data for the selected mode to generate n gamma voltages (wherein n is an integer) having a different voltage level using a plurality of digital to analog converters (DACs), the digital to analog converters responding to the digital gamma data respectively" have been fully considered, extensively searched in prior art and US-PGPUB and are persuasive as they do

overcome prior art rejection; which puts application number 09892997 in condition for allowance.

4. Claims 1-8,13-17,21,25,29,30,32 and 34-39 are allowed.

5. The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed on 05-18-2007 are convincing. As argued by applicant in remarks under claim rejection page 9, paragraphs 5,6 and page 10, and page 11, paragraphs 1,2 the prior art of Tone (U.S. Patent 6,046,712); Margulis et al. (6,157,396); Nishimura et al. (6,169,505 B1) and Hiroki (U.S. 6,771,238) fails to recite or disclose the uniquely distinct features represented by underlined bold claim below with all the other recited limitations of the independent claims;

a memory means for storing at least two sets of digital gamma data for at least two input modes, a gamma control means for accessing one set of the digital gamma data in response to a selection signal, a multi-channel gamma voltage generator having a plurality of digital to analog converters (DACs), the digital to analog converters generating n gamma voltages (wherein n is an integer) having a different voltage level in response to the digital gamma data respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
